DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-6, drawn to an anti-viral agent, classified in class 514, subclass 44.
- II. Claims 7 and 8, drawn to a method of treating a viral disease, classified in class 424, subclasses 184.1, 201.1 and 202.1. If applicant elects this group, applicant is further required to elect a single virus recited in claim 8.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the product of group I can be used to in various methods of treating infection of different viruses, such as hepatitis type B, C, D, E, Dengue, flaviviruses, Rubella, Yellow fever, bovine viral diarrhea virus, swine fever virus or foot and mouth disease. Each of the viruses infect different host populations. In addition, each viral infection results in different pathology and symptoms. These factors are critical for administering a method of treating these unrelated viral diseases.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and divergent subject matter, restriction for examination purposes as indicated is proper.

Art Unit: 1648

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
